

Angel Hair Trap

Angel Hair can wrap around augers, cause material to bridge hoppers, and contaminate your system. By installing an Advanced Blending Solutions Angel Hair Trap you can remove these stringers before they become a problem. Angel Hair Traps can also be used as a tool to pinpoint where Angel Hair is being created. Install several or move them around your resin system to find problem areas.

Advanced Blending Solutions manufactures a full line of vacuum convey, blending, gravimetric, and control equipment for the plastics industry. Advanced Blending Solutions also offers a full line of PLC-based controls for gravimetric extrusion control, vacuum sequence control, extruder/die temperature control, and blender control. Advanced Blending Solutions offers PLC-based control retrofits for any blender on the market.

- Field proven.
- Floor-mount or Line-mount design.
- Removes stringers without disruption of material flow.
- Clear view window for level detection.
- Easy clean-out.
